Volume 211 February 1990

CONTENTS

Theoretical study of turbulent channel flow: bulk properties, pressure fluctuations, and propagation of electromagnetic waves. V. M. Canuto, G. J. Hartke, A. Battaglia, J. Chasnov and G. F. Albrecht *page* 1

Vortex formation around an oscillating and translating airfoil at large incidences. Kazuo Ohmi, Madeleine Coutanceau, Ta Phuoc Loc and Annie Dulieu 37

Attenuation and dispersion of sound in bubbly fluids via the Kramers–Kronig relations. S. Temkin 61

Stability of the flow past a sphere. Inchul Kim and Arne J. Pearlstein 73

Experimental investigation of three-dimensional turbulent boundary layers on 'infinite' swept curved wings. V. Baskaran, Y. G. Pontikis and P. Bradshaw 95

Breakup of concentric double emulsion droplets in linear flows. H. A. Stone and L. G. Leal 123

A visual study of the flow around an oscillating cylinder at low Keulegan–Carpenter numbers and low Stokes numbers. M. Tatsuno and P. W. Bearman 157

Oscillating flows over periodic ripples. Tetsu Hara and Chiang C. Mei 183

Vortex street impinging upon an elliptical leading edge. Ismet Gursul and Donald Rockwell 211

An experimental study of a turbulent vortex ring. Ari Glezer and Donald Coles 243

A supersonic turbulent boundary layer in an adverse pressure gradient. Emerick M. Fernando and Alexander J. Smits 285

Velocity, scalar and transfer spectra in numerical turbulence. Robert M. Kerr 309

The hydrodynamic force on an oscillating ship with low forward speed. G. X. Wu and R. Eatock Taylor 333

Parallel flows with Soret effect in tilted cylinders. David Jacqmin 355

Spreading and instability of a viscous fluid sheet. L. M. Hocking 373

Stability of stationary barotropic modons by Lyapunov's direct method. H. Sakuma and M. Ghil 393

The effect of background rotation on fluid motions: a report on Euromech 245. E. J. Hopfinger and P. F. Linden 417

The three-dimensional stability of finite-amplitude convection in a layered porous medium heated from below. D. A. S. Rees and D. S. Riley 437

The influence of wave breaking on the surface pressure distribution in wind–wave interactions. MICHAEL L. BANNER 463

A generalized lifting-line theory for curved and swept wings. JEAN-LUC GUERMOND 497

A jet in crossflow. Part 2. D. J. NEEDHAM, N. RILEY, C. C. LYTTON and J. H. B. SMITH 515

Turbulent boundary-layer relaxation from convex curvature. AMY E. ALVING, ALEXANDER J. SMITS and JONATHAN H. WATMUFF 529

The complete second-order diffraction solution for an axisymmetric body. Part 2. Bichromic incident waves and body motions. MOO-HYUN KIM and DICK K. P. YUE 557

Nonlinear flow phenomena in a symmetric sudden expansion. R. M. FEARN, T. MULLIN and K. A. CLIFFE 595

A note on integral properties of periodic gravity waves in the case of a non-zero mean Eulerian velocity. G. KLOPMAN 609

On periodic and solitary wavelike solutions of the intermediate long-wave equation. TOUVIA MILOH 617

Knotted vortex filaments in an ideal fluid. J. P. KEENER 629

On unsymmetrically impinging jets. JOSEPH B. KELLER 653

REVIEWS

Workbook on the Dispersion of Dense Gases, by R. E. Britter and J. McQuaid 656

Fluid Sciences and Materials Science in Space, edited by H. U. Walter 657

Mathematical Problems of Statistical Hydromechanics, by M. J. Vishik and A. V. Fursikov 659

Dynamics of Polymer Liquids. Vol. 1, edited by R. B. Bird, R. C. Armstrong and O. Hassager; Vol. 2, edited by R. B. Bird, C. F. Curtiss, R. C. Armstrong and O. Hassager 660
